Interpretation of Accounts Question 5

#### **PAST TOPIC - QUESTION 5**

|              | 2023 | 2022 | 2021 | 2020 | 2019 | 2018 | 2017 | 2016 | 2015 | 2014 | 2013 | 2012 | 2011 | 2010 | 2009 | 2008 |
|--------------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|------|
| Bank Manager |      | Yes  |      |      |      |      | Yes  |      |      | Yes  |      |      | Yes  |      |      |      |
| Shareholders |      |      | Yes  | Yes  | Yes  |      |      | Yes  |      |      |      | Yes  |      |      | Yes  | Yes  |
| Debentures   | Yes  |      |      |      |      | Yes  |      |      |      |      |      |      |      | Yes  |      |      |
| Investor     |      |      |      |      |      |      |      |      | Yes  |      |      |      |      |      |      |      |
| Friend       |      |      |      |      |      |      |      |      |      |      | Yes  |      |      |      |      |      |

NOTE – Investors and Friends can use the same headings as Shareholders.

Remember if asked about granting a loan – you must recalculate the gearing ratio including the increase in the loan

<u>2023 - O'Malley</u>

#### **Dividend cover**

You are required to calculate the following for 2022: Dividend cover.

|                                                                                               |                                               |                          | <u>2023 -</u>        |
|-----------------------------------------------------------------------------------------------|-----------------------------------------------|--------------------------|----------------------|
| Formula                                                                                       | <u>Net Profit – Preferen</u><br>Ordinary Divi |                          | Investment<br>Ratios |
| <ul><li>First, we need to calcu</li><li>1. Preference Div</li><li>2. Ordinary Divid</li></ul> | idends and                                    |                          |                      |
| Dividends paid                                                                                | €40,000                                       | Taken form the Question. |                      |
| Preference Dividends<br>Ordinary Dividends                                                    | <u>€4,000</u><br>€36,000                      | See working below.       |                      |

#### Ordinary Dividends

Remember the figure for dividends paid is made up of ordinary dividends and preference dividends added together. So, to find ordinary dividends we take the preference dividends figure away from the dividends paid figure.

|                | = | €104,000 - €4,000 |
|----------------|---|-------------------|
|                |   | €36,000           |
|                | = | <u>€100,000</u>   |
|                |   | €36,000           |
|                | = | 2.7777            |
| Dividend Cover | = | 2.78 Times        |
|                |   |                   |

#### Interpretation of Accounts Question 5

| 80%           | = | €70,000      |
|---------------|---|--------------|
| 1%            | = | €70,000 / 80 |
|               | = | €875         |
| 20%           | = | €875 * 20    |
|               | = | €17,500      |
|               |   |              |
| Cash Purchase | = | €17,500      |

IMPORTANT – You must include the units with your answer – For example if it is €, Times

#### Interest cover.

You are required to calculate the following for 2020: Interest cover. 2021 – Ratio (Fauci PLC)

Formula

Net Profit Before Interest and Tax

Interest

Gearing Ratios

- = <u>€39,000 + €20,000</u> €20,000
- = <u>€59,000</u>
  - €20,000
- = 2.95 Times

## **PAST COMMENT QUESTIONS - QUESTION 5**

#### DEBENTURES

Remember to use the following headings and ratios when commenting on part B. These will be used from a **Debentures point of view.** 

| Performance   |             | State of Affairs |             |             | Prospectus |  |
|---------------|-------------|------------------|-------------|-------------|------------|--|
| Profitability | Dividend    | Liquidity        | Gearing     | Security    | Sector     |  |
|               | Policy      |                  |             |             |            |  |
| 1. ROCE       | 1. Dividend | 1. Acid          | 1. Gearing  | 1. Security | 2. Sector  |  |
|               | Cover       | Test             |             |             |            |  |
| 1. EPS        | 2. Dividend |                  | 2. Interest |             |            |  |
|               | Pay out     |                  | Cover       |             |            |  |

Try to use the following sentence to help you remember the headings for Debenture comments -

Patricia Doyle Loves Grading In School

#### <u>NOTE</u>

You might have to calculate some ratios still for part B – calculate them quickly using your calculator and make a record of the figures.

Important Ratios for PART B

- 1. Earnings Per Share
- 2. Interest Cover

7. Acid Test Ratio

6. Dividend Per share

- 3. Market Value per share 8. Return on Capital Employed
- 4. Gearing 9. Dividend Cover
- 5. Dividend Yield

# PART B COMMENTING ON THE COMPANY

Using the following figures from the 2023 Exam Paper (O'Malley Ltd)

| Ratios and information for year |            |  |
|---------------------------------|------------|--|
| ended 31/12/2022                |            |  |
| ROCE                            | 13.23%     |  |

## PERFORMANCE

# PROTIFABILITY

#### ROCE

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend.
- 3. Say if the company is profitable compared to risk free investments.
- 4. Compared to debenture & preference rates.
- 5. Would debenture holders be satisfied/dissatisfied? And why

#### **Template**

- 1. In \_\_\_\_\_ the ROCE is \_\_\_%. In \_\_\_\_ the ROCE was \_\_%
- 2. This is an *improvement / dis-improvement* of \_\_\_\_\_% and is a *positive / negative* trend
- 3. The company is *profitable / not profitable* as the return is higher than risk free investment of 0-2%
- 4. The company is borrowing at a rate of \_\_\_\_% (debenture) and getting a return higher / below this why borrow at a rate higher than the return. Preference share capital has a rate of \_\_\_\_%. The company is / is not making effective use of resources.
- 5. Debentures holders would be *satisfied / dissatisfied* as the company is making *more / less* efficient use of its resources available to them.

#### Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the ROCE is <u>13.23</u>%. In <u>2021</u> the ROCE was <u>14.8</u>%
- 2. This is a *dis-improvement* of <u>1.05</u>% and is a *negative* trend.
- 3. The company is profitable as the return is higher than risk free investment of 0-2%
- 4. The company is borrowing at a rate of <u>8</u>% (debenture) and getting a return *higher*. The company *is not* making effective use of resources. The preference shares capital rate of <u>4</u>%
- 5. Debenture holders would be *dis-satisfied* as the company is making *less* efficient use of its resources available to them

<u>Tip</u> – MUST include the text that is in bold

<u>**Tip**</u> – Fill in the blank as per your workings and use the correct statement to complete

your comment

## Earnings Per share

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend.
- 3. Would debenture holder be satisfied/dissatisfied?

#### **Template**

- 1. In \_\_\_\_\_ the EPS is \_\_\_\_\_ c. In \_\_\_\_\_ the EPS was \_\_\_\_c
- 2. This is an *improvement / dis-improvement* of \_\_\_\_\_c and is a *positive / negative* trend.
- 3. Debenture holders would be *satisfied* / *dissatisfied* as the management is *using* / *not using* the resource available to them efficiently.

#### Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the EPS is <u>22.22</u> c. In <u>2021</u> the EPS was <u>23</u> c
- 2. This is a *dis-improvement* of .<u>78</u> c and is a *negative* trend.
- 3. Debenture holders would be *dissatisfied* as the management is not using the resources available to them efficiently.

# **DIVIDEND POLICY**

# Dividend Cover

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend.
- 3. Would debenture holders be satisfied/dissatisfied?

#### **Template**

- 1. In \_\_\_\_\_\_the Dividend cover is \_\_\_\_\_times, In \_\_\_\_\_the

   Dividend cover was \_\_\_\_\_\_times
- 2. This is an *improvement / dis improvement* and is a *positive / Negative* trend. It means *more / less* profit is being retained for expansion purposes and repayment of loans.
- 3. Debenture holders would be *satisfied / dis satisfied* with this.

<u>**Tip**</u> – Fill in the blank as per your workings and use the correct statement to complete your comment

<u>**Tip**</u> – MUST include the text that is in bold

<u>Tip</u> – Fill in the blank as per your workings and use the correct statement to complete your comment

<u>**Tip**</u> – MUST include the text

that is in bold

## Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the Dividend cover is <u>2.78</u> times, In <u>2021</u> the Dividend cover was <u>2.57</u> times.
- 2. This is an *improvement* and is a *positive* trend. It means *more* profit is being retained for expansion purposes and repayment of loans.
- 3. Debenture holders would be *satisfied* with this.

## Dividend Pay-out

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend.
- 3. Would debentures be satisfied/Dissatisfied?

## **Template**

- 1. In \_\_\_\_\_the Dividend payout is \_\_\_%. In \_\_\_\_\_the Dividend payout was \_\_\_\_%
- <u>Tip</u> Fill in the blank as per your workings and use the correct statement to complete your comment
- 2. This is an *improvement / dis-improvement* of \_\_\_\_\_c. This is a *positive / negative* trend.
- 3. Debenture holders would be *satisfied / dis satisfied* with this in the short terms as it indicates how much the company *is / is not* retaining for expansion and paying interest.

#### Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the dividend pay-out is <u>35.97</u>%. In <u>2021</u> the dividend pay-out was <u>38.9</u>%
- 2. This is an *improvement* and a *positive* trend.
- 3. Debenture holders would be <u>satisfied</u> with this in the short term as it indicates how much money the company *is* retaining for expansion and paying interest

| <u>Tip</u> – MUST include the text that is<br>in bold           |
|-----------------------------------------------------------------|
| <u>Note</u> - This can also be<br>included under Profitability. |

#### Note - Dividend Pay-Out

- 1. Dividend pay-out should be less than 50% for Debenture holders to be satisfied.
- 2. If above 50% they are paying out too much dividend this means that debenture holders will not be happy as the company is not retaining enough money for expansion and paying interest.
- 3. If below 50% Debenture holders would be happy as the company should have enough retained for expansion and paying interest.
- 4. The formula to calculate Dividend payout is = DPS/EPS x 100/1 = %

# STATE OF AFFAIRS

# LIQUIDITY

#### Acid Test Ratio

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend (compare to recommended ratio)
- 3. Does it have a liquidity problem can they pay debts in the short term.
- 4. Would Debenture holders be satisfied/dis-satisfied.
- 5. Will the company be able to pay back the debt if the trends continue.

#### <u>Template</u>

1. In \_\_\_\_\_ the acid test ratio is \_\_\_\_\_ In \_\_\_\_ the acid test ratio was \_\_\_\_\_

<u>**Tip**</u> – Fill in the blank as per your workings and use the correct statement to complete your comment

- 2. This is an *improvement / Dis-improvement* of \_\_\_\_\_c and is *above / below* the recommended ratio of 1:1
- 3. \_\_\_\_\_PLC *does / does not* have a liquidity problem and are *able / not able* to pay their debts as they fall due in the short term. This is because they have €\_\_in liquid assets for every euro it owes in the short term.
- 4. Debenture Holders will be *satisfied / dis satisfied* as <u>PLC will / will not</u> have problems paying out dividends or other short-term debts as they fall due.
- 5. If this trend continues, the ability to pay interest *would / would not* come under pressure and funds *would / would not* be available to invest for the purpose of repaying the loan.

# Interpretation of Accounts Question 5

<u>Tip</u> – MUST include the text that is in bold

#### Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the acid test ratio was <u>1.20:1</u>. In <u>2021</u> the acid test ratio was <u>1.5:1</u>
- 2. This is a *dis-improvement* of .30 c but is *above* the recommended ratio of 1:1
- 3. <u>O'Malley</u> LTD does not have a liquidity problem and will be *able* to pay their debts as they fall due in the short term. This is because they have €<u>1.20</u> in liquid assets for every euro it owes in the short term.
- 4. Debenture holders will be <u>satisfied</u> as <u>O'Malley</u> Ltd will not have problems paying out dividends or other short-term debts as they fall due
- 5. If this trend continues, the ability to pay interest *would* come under pressure and funds *would not* be available to invest for the purpose of repaying the loan.

# GEARING

#### Gearing

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend and it the company is a lowly/highly geared company.
- 3. Does it depend on outside borrowing.
- 4. Would debenture holders be satisfied/dis-satisfied.

#### Template

- 1. In \_\_\_\_\_ the gearing ratio is \_\_\_\_%. In \_\_\_\_ the gearing ratio was \_\_\_\_%
- This is an improvement / dis improvement and is a positive / negative trend. But the company is a lowly / highly geared company and is finance more by debt / equity than by equity / debt
- 3. This means the company is *dependent / less dependent* on outside borrowing and would appear to be *less / more* of a risk from outside investors. Debenture holders would be *satisfied / dis-satisfied* as the business is now *less / more* dependent on outside borrowing and would will be paying *higher / lower* interest payment,
- 4. There is a less significant / significant risk to the firm from outside investors.

<u>**Tip**</u> – Fill in the blank as per your workings and use the correct statement to complete your comment.

### Suggested Solution (2023 – O'Malley LTD)

- 1. In <u>2022</u> the gearing ratio is <u>48.64</u> %. In <u>2021</u> the gearing ratio was <u>35</u> %
- 2. This is a *dis-improvement* and is a *negative* trend. The company is a *lowly* geared company. But the company is a *lowly* geared company and is finance more by *equity* than by *debt*
- 3. This means the company is *less dependent* on outside borrowing and would appear to be *more* of a risk from outside investors. Debenture holders would be *satisfied* as the business is now *less* dependent on outside borrowing and would will be paying *lower* interest payment,
- 4. There is a less significant risk to the firm from outside investors.

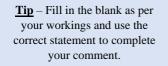

#### Interest Cover

#### **Questions to answer**

- 1. Say what you see compared to previous years.
- 2. Is this an improvement/dis-improvement, positive or negative trend. It is above/below the recommended ratio of 3:1
- 3. What does it mean is there enough money for expansion, paying dividends and interest.
- 4. Would debenture holders be satisfied/dis-satisfied.
- 5. Make reference to when the debenture will be paid off.
- 6. Also make reference to the bnak acount and debtors

#### **Template**

 1. In \_\_\_\_\_\_the Interest Cover is \_\_\_\_\_times. In \_\_\_\_\_the interest cover was \_\_\_\_\_\_times

- 2. This is an *improvement / dis-improvement* and is a *positive / negative* trend. It is *above / below* the recommended ratio of 3:1
- 3. This means the firm has *more / less* money available for expansion, paying dividends and paying interest/loans.
- 4. Debenture holders would be satisfied / dissatisfied with this. The company is still / not able to meet its interest commitments, but the worsening / improving trend combined with good / poor liquidity would concern debenture holders.
- 5. The Debentures are not listed for repayment until \_\_\_\_\_ plc has *enough / not enough* time to put aside resources to be able to repay these when the time comes.

Interpretation of Accounts Question 5

> <u>Tip</u> – MUST include the text that is in bold

6. The bank account *is* / *is* not overdrawn, and Debtors owe €\_. \_\_\_PLC should / should not follow this up.

# Suggested Solution (2023 – O'Malley)

- 1. In <u>2022</u> the Interest Cover is <u>4.25</u> times. In <u>2021</u> the interest cover was <u>7.12</u> times.
- 2. This is a *dis-improvement* and is a *negative* trend but is *above* the recommended ratio of 3:1
- 3. This means the firm has *less* money available for expansion, paying dividends and paying interest/loans.
- 4. Debenture holders would be *dissatisfied* with this. The company is *still* able to meet its interest commitments, but the *worsening* trend combined with *poor* liquidity would concern debenture holders.
- 5. The Debentures are not listed for repayment until <u>2026</u>. <u>O'Malley</u> LTD has *enough* time to put aside resources to be able to repay these when the time comes.

# SECURITY

#### Security

#### **Questions to answer**

- 1. Say what the fixed assets value is, and the depreciation policy should be questioned.
- 2. Look at the investment have they improve / dis-improved. Would debenture holders be satisfied / dissatisfied.
- 3. Is there an existing loan (Debenture), does the value of the tangible asset cover the value. Is there security for a new loan.
- 4. If the tangible assets are high, they should be questioned.

### **Template**

Tangible fixed assets including investment are valued at €\_\_\_\_. The depreciation policy should be

questions to ascertain the true value of tangible assets.

- The investment cost € \_\_\_\_\_ but now has a value of € \_\_\_\_\_. This shows efficient / inefficient investment decision by management. Debenture holders would be dissatisfied / satisfied with this.
- 3. There is an existing loan (Debenture) of €\_\_\_\_\_\_to be repaid in \_\_\_\_\_. The

   45 | P a g e

<u>**Tip**</u> – Fill in the blank as per your workings and use the correct statement to complete your comment.

<u>**Tip**</u> – MUST include the text that is in bold value of the tangible assets are *adequate / not adequate* to cover this loan (Debenture). There *is / is no* security for this loan (Debenture)

4. The intangible assets figure should be *questioned / not questioned* as they *are / are not* generating income for a high amount (Only included it the intangible figure is high)

# Suggested Solutions (2023 – O'Malley LTD)

- Tangible fixed assets including investment are valued at €<u>970,000</u>. The depreciation policy. should be questions to ascertain the true value of tangible assets.
- The investment cost €<u>300,000</u> but now has a value of €<u>310,000</u>. This shows *efficient* investment decision by management. Debenture holders would be *satisfied* with this.
- There is an existing loan (Debenture) of €<u>400,000</u> to be repaid in <u>2026</u>. The value of the tangible assets in *adequate* to cover this loan (Debenture). There *is* security for this loan (Debenture)

<u>**Tip**</u> – MUST include the text that is in bold

Interpretation of Accounts Question 5

# PROSPECTS

| SECTOR |  |
|--------|--|
|--------|--|

#### <u>Sector</u>

#### **Questions to answer**

- 1. Say what sector the business is.
- 2. Say what the short-term goals are.
- 3. Say what the long-term goals are.

### **Template**

- 2. In the short term this industry *is / is not* growing as more \_\_\_\_\_
- 3. In the long term this industry *is / is not* growing as \_\_\_\_\_

#### Suggested Solution (2023 – O'Malley LTD)

- 1. <u>O'Malley</u> LTD is a <u>retailer in the fast-food</u> industry.
- 2. In the short term this industry is *not growing* as people become more health conscious and move away to healthier foods.
- 3. In the long term, this industry is *not growing* as it is a highly competitive industry with many well-known brands to compete against.

<u>Note</u> – Make sure to a positive or negative for short term and long term prospectives <u>Tip</u> – Fill in the blank as per your workings and use the correct statement to complete your comment.

<u>Tip</u> – MUST include the text that is in bold

# OVERALL

The debentures holders would be satisfied with the company. However, they would be concerned with the disimproving trends in certain parts of the company such as in profitability, liquidity and gearing.

<u>Note</u> – Always say if the party (debenture, shareholder, or bank manager) would be satisfied or not satisfied. Marks will be given for this and students leave it out

# **PAST THEORY QUESTIONS - QUESTION 5**

## Questions

#### <u>2023 – Question 5 – Part C</u>

- (i) Distinguish between the terms liquidity and solvency when used in ratio analysis.
- (ii) A rising liquidity ratio is a sign of prudent management. Briefly discuss. (10)

#### <u>2022 – Question 5 - Part C</u>

The gross profit percentage of Watson plc in 2020 was 36%.

- (i) Calculate the gross profit percentage for Watson plc in 2021.
- (ii) Give possible reasons for the change in gross profit percentage in 2021.
- (iii) Outline how a company could improve their gross profit percentage. (10)

#### <u>2021 – Question 5 - Part C</u>

- 1. What are the disadvantages to a business of having a high gearing?
- 2. Explain two ways to reduce gearing of a company. (10)

#### <u>2020 – Question 5 - Part C</u>

1. Explain how a faster stock turnover can increase the profitability of a business

(10)

#### <u>2019 – Question 5 - Part C</u>

Shannon plc is considering acquiring a solar panel company, Gener8 Ltd in 2019. Gener8 Ltd has supplied the following balance sheet information for 31/12/2018.

| Closing stock    | €47,000 |
|------------------|---------|
| Creditors        | €45,000 |
| Debtors          | €39,000 |
| Expenses accrued | €15,000 |
| Expenses prepaid | €13,000 |
| Bank overdraft   | €16,500 |

Based on the information given in the above table:

(i) Calculate the current ratio for Gener8 Ltd. Calculate the acid test ratio for Gener8 Ltd.

49 | P a g e

Using the calculated figures explain why it is important for Shannon plc to analyse the liquidity position for Gener8 Ltd.
 (10)

# 2018 – Question 5 - Part C

Born2Run plc is considering expansion by purchasing a small sportswear company. It has obtained the following information relating to this company:

|                                          | 2014     | 2015     | 2016    | 2017    |
|------------------------------------------|----------|----------|---------|---------|
| Period of credit allowed to debtors      | 60 days  | 54 days  | 46 days | 40 days |
| Period of credit received from creditors | 20 days  | 26 days  | 30 days | 34 days |
| Stock turnover                           | 12 times | 11 times | 9 times | 6 times |

Having analysed the information in the above table, what advice would you give Born2Run plc regarding this purchase? (10)

# <u>2017 – Question 5 - Part C</u>

- 1. As an employee I would be interested in the financial information for the following reasons
- 2. Identify two other users of financial information (10)

# <u>2016 – Question 5 - Part C</u>

- 1. Explain the term 'Gearing'.
- 2. What are the benefits to a business of having a low gearing?
- 3. State two ways to reduce the gearing of a company. (15)

# <u>2015 – Question 5 - Part C</u>

State the limitations of ratio analysis as a financial analysis technique (10)

<u>2010 – Question 5 - Part C</u> Question on advice to a friend

### **Suggested Solutions**

## 2023 – PART C

# **Distinguish between the terms liquidity and solvency when used in ratio analysis.** Liquidity

- 1. This measures the ability of the company to pay its short-term debts as they fall due.
- 2. The acid test ratio is a good indicator of liquidity as it includes only liquid assets

For examples - cash and debtors

#### Solvency

- 1. Solvency is the ability of a company to pay all of its debts as they fall due for payment .
- 2. Solvency is the most important indicator of a business's ability to survive in the long term.
- 3. A business is solvent if its total assets exceeds its outside liabilities.

For Examples the gearing ratios of debt to equity are good guides.

#### A rising liquidity ratio is a sign of prudent management. Briefly discuss.

- 1. Prudent management in accounting refers to the responsible and cautious approach taken by management in financial matters. It involves making decisions and taking actions that prioritise the long-term sustainability and stability of the business.
- 2. A rising liquidity ratio indicates that is easier for the firm to pay its short-term debts on time and avoiding paying interest or helping to achieve cash discounts for prompt payment.
- 3. If the ratio is much higher than 1:1 it could mean that the company has too much of its resources tied up in liquid assets when they could be invested in fixed assets enhancing the productive capacity of the business.

# 2022 – PART C

1

The gross profit percentage of Watson plc in 2020 was 36%. Calculate the gross profit percentage for Watson plc in 2021.

#### Formula

<u>Gross Profit</u> x <u>100</u>

Sales

#### Interpretation of Accounts Question 5

# Revision Seminar Limerick BSTAI

| Gross profit   | = | 950,00 | 00-682,000                                         |                                                                                                                                                                                                                         |                                                                                                |

# Give possible reasons for the change in gross profit percentage in 2021.

Possible reason for this fall could be the following

- 1. Sales (i) A reduction in selling price to get rid of stock
  - (ii) Cash sales not being recorded
- 2. Cost of Sales (i) An increase in the cost of sales for raw materials (Purchases)
  - (ii) Theft of opening / closing stock
  - (iii) Overvaluing opening stock or undervaluing closing stock

# Outline how a company could improve their gross profit percentage.

- 1. Sales (i) Increase the selling price (without increasing the purchase price)
- 2. Cost of Sales (i) Reduce the cost of sale by shopping around and finding competitive Suppliers
  - (ii) avail of discounts for bulk buying or paying before the invoice due Date
  - (iii) Use cash discount instead of relying on credit

# 2021 – PART C

# What are the disadvantages to a business of having a high gearing?

When fixed interest debt is a high proportion of overall capital it has the following

disadvantages:

- High interest repayments mean less profits are available for investment elsewhere in The business
- 2. Shareholders are less likely to get a good dividend when gearing is high.

- 3. The business would find it more difficult to raise additional loan finance.
- 4. There is a higher risk of liquidation due to not being able to make interest payments.

## Explain two ways to reduce gearing of a company.

- 1. Sell more ordinary shares to increase shareholders equity as a proportion of capital employed.
- 2. Reduce or repay loans to reduce fixed interest debt as a proportion of capital employed.
- 3. Increase reserves/retained profits to increase shareholders equity as a proportion of capital employed.
- 4. Convert long-term debt to ordinary shares reducing fixed interest debt and increasing Shareholders equity.

# 2020 – Part C

#### Explain how a faster stock turnover can increase the profitability of a business.

- 1. Each time stock is sold, because it contains a mark-up, profitability increases.
- 2. If the cost of buying the extra stock increases at a slower rate than the mark-up then profitability increases.
- 3. The more times the stock is turned over the greater the mark-up and profit will be increased.
- 4. Where stock turnover is high less stock may be held resulting in reduced stock holding costs (insurance, waste etc.) which could lead to an increase in profitability.
- 5. A faster stock turnover means that the firm may enjoy economies of scale, such as bulkbuying discounts, which will reduce costs and increase profitability.

# 2017 – PART C

#### As an employee I would be interested in the financial information for the following reasons

- 1. To assess job security.
- 2. To see if shareholder dividends are increasing which could be used as a negotiation strategy.
- 3. To see if the company can continue to pay existing wage rates or can it afford a pay rise.
- 4. To see if the company plans to expand and thereby assess the prospects for promotion.
- 5. To assess pension security.

## Identify two other users of financial information

- 1. Lending institutions 4. Trade creditors
- 2. shareholders, 5. The revenue,
- 3. competitors 6. Directors.

## 2016 – Part C

### **Explain Gearing**

- 1. This is a measure of how a business is financed on a long-term basis.
- 2. It measures the relationship between fixed interest debt (loans/debentures + preference shares) and total capital employed/equity.
- 3. When this is less than 50%/100%, the business is lowly geared. Above 50%/100% is highly geared. Low gearing is preferable.

### What are the Benefits of a low gearing Company?

When fixed interest debt is a small proportion of overall capital it has the following benefits:

- 1. Low interest repayments mean more profits are available for investment elsewhere in the business.
- 2. Shareholders are more likely to get a dividend when gearing is low.
- 3. The business should find it easier to raise additional loan finance.
- 4. Less risk of liquidation due to not being able to make interest payments.

#### State two ways to reduce gearing in a company

Possible ways to reduce gearing includes the following

- 1. Sell more ordinary shares.
- 2. Reduce or repay loans.
- 3. Increase reserves/retained profits.
- 4. Convert long-term debt to ordinary shares.

# 2015 – Part C

## State the limitations of ratio analysis as a financial analysis technique

- 1. It analyses past figures only and these figures are quickly out of date (historical). It merely gives us clues to the future.
- 2. Ratios do not show seasonal fluctuations
- 3. Firms use different accounting bases and therefore company comparisons are not accurate
- 4. Financial Statements do not reveal other important aspects of a company
- 5. Accounts alone cannot measure aspects which may be extremely significant such as monopoly position, economic climate, staff morale and management/staff relationships.

# 2014 – Part C

Explain the difference between the terms 'Liquidity' and 'Solvency' when used in Ratio Analysis. Refer to relevant ratios in your explanation.

Liquidity

- 3. This measures the ability of the company to pay its short-term debts as they fall due.
- 4. The acid test ratio is a good indicator of liquidity as it includes only liquid assets

For examples  $- \operatorname{cash}$  and debtors

# Solvency

- 4. Solvency is the ability of a company to pay all of its debts as they fall due for payment .
- 5. Solvency is the most important indicator of a business's ability to survive in the long term.
- 6. A business is solvent if its total assets exceeds its outside liabilities.

For Examples the gearing ratios of debt to equity are good guides.

# 2012 – Part C

# Calculate the gross profit percentage for 2011.

Gross Profit percentage = 24.68%

#### Give 5 different explanations for the decrease/increase in 2011

| Cash losses                  | cash sales not recorded                                 |
|------------------------------|---------------------------------------------------------|
| Stock losses                 | pilferage of stock or obsolescent stock                 |
| Change in sales mix          | more sales of low markup goods                          |
| Mark downs                   | during sales to get rid of out-of-date stock            |
| Incorrect valuation of stock | overvalue of opening stock, undervalue of closing stock |
| Increased cost of sales      | without an increase in sales price                      |
| Falling sales price          | without corresponding drop in cost of sales             |

## 2011 – Part C

### Explain the limitations of ratio analysis

State the limitations of ratio analysis as a financial analysis technique

- 1. It analyses past figures only and these figures are quickly out of date (historical). It merely gives us clues to the future.
- 2. Ratios do not show seasonal fluctuations
- 3. Firms use different accounting bases and therefore company comparisons are not accurate
- 4. Financial Statements do not reveal other important aspects of a company
- 5. Accounts alone cannot measure aspects which may be extremely significant such as monopoly position, economic climate, staff morale and management/staff relationships
